Field Crops

The State experienced a few rain and snow events although harvest progress was able to advance significantly, according to Marlo D. Johnson, Director of the Great Lakes Regional Office of the National Agricultural Statistics Service. There were 4.3 days suitable for fieldwork in Michigan during the week ending November 14, 2021. **Corn** harvest continued on pace as producers took full advantage of dry spells. Reported grain moisture was 18 percent, down 1 percentage point from the previous week. **Soybean** harvest continued behind the five-year average although significant progress was made. Reported soybean moisture was 16 percent, unchanged from the previous week. **Sugarbeet** harvest continued slightly ahead of the five-year average. **Winter wheat** planting made progress as 81 percent of the crop was emerged. Other activities included fall tillage, hauling grain, and catching up on paperwork.
